

## *Saving Lives*

*Nowadays, there are many kinds of robots. Some of them help people do the housework or help the police. They are useful and intelligent. Robots can do many things that we aren't able to do or things which are dangerous.*

*Today, we will talk about our robot which can save people's lives.*

*We can't avoid being hurt from earthquakes, fires or tsunamis. If we only use the energy of the humans, it's helpless. That's why we need robots.*

*Robots can search for people who are in danger, under the debris or who are drowning.*

*Some robots also can transport the wounded.*

*Robots are useful for us. If we use them in needed situation, they can make our life more convenient.*

*If we can use the life saving robot, the more people can be saved in time .*

*Nowadays, more and more countries use this kind of robot .*

*If we keep on going on this programme , we will be able to save more people in the future.*
