

Since this school year, the graduates of Romance Languages High School have been working on a project entitled "Migration in Europe – Let's share our differences and move on!" in the context of the Erasmus + program. In order to get to know this issue better, participants met some representatives of the Immigration Information Center in Burgas.

The center is visited by immigrants who want to learn Bulgarian language, who need individual counseling on problems related to residence, right to work, recognition of education acquired abroad, acquisition of citizenship and many other issues to facilitate their integration in our reality.

The coordinator - Mrs. Irina Bulanova and the associate - Mrs. Violeta Stoeva, told about the numerous holidays and celebrations organized with migrants, permanently settled in Burgas and the region.

The topic about the status of young people leaving our country to study or work abroad was also discussed. Participants in the meeting united around the view that globalization favours the free movement of people. This process should make us better and more tolerant to one another. The

road to this change necessarily goes through the good awareness, supported by various European programs such as Erasmus + and institutions working on them.
