What differences have you remarked between your country and the hosting country (school organisation / accommodation / eating habits/ environment...)?

13 risposte

The school system, the food, the fact that they have a canteen with first plate and all just for the lunch and the dinner for the people who rest in the school even for sleep, etc...

The school organisation and the food principally

In my opinion the school in France was really well organized. There are a few difference about the lifestyle but it was interesting to discover the difference between our way of life and their habits.

School organization is completely different from our, the accommodation has been excellent, times and things to eat are different from ours, even the environment is different from our.

France is better

what I noticed immediately were the clean streets

The classes in France are longer.

The food

In Bulgaria, we are studying a little bit different. Our classes are shorter and we are studying a lot of materials. In France the students are having a long time for lunch and also they have very good canteen with a lot of different food, which is really good for them. But both of the schools have a lot of good students.

the school organisation was very different and also the lifestyle

the school food

no

language

What is the aspect that you have learnt and will treasure mostly during this LTT?

8 risposte

The fact that we could become immigrants in every moment and the fact that there are countries that can welcome you

The importance of the welcoming center and the importance of listen and understand the story, the life and the problems of the immigrants.

The thing that I understood is that you need to compare yourself with other people from all over the world.

to keep the streets clean

I learnt more about the migration and about the school in France.

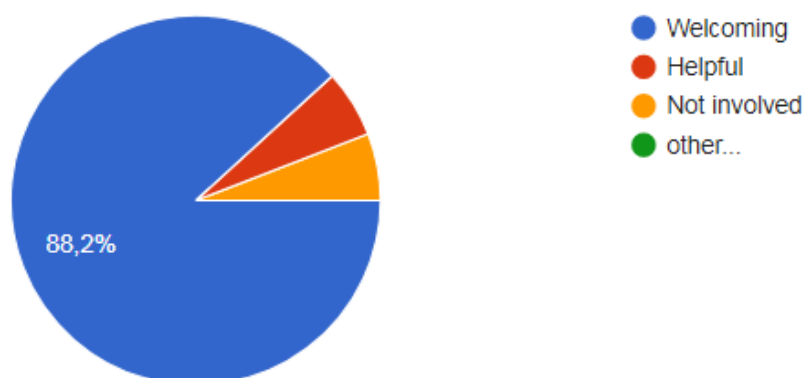

I learned a lot of things about the migration, just like I have wanted.

no

friendship
